

CONTENTS

M. K. Aouf, T. M. Seoudy Differential sandwich theorems of p -valent analytic functions involving a linear operatorr	5
Sami Baraket, Imen Bazarbacha, Saber Kharrati, Taieb Ouni Singular limits for 2-dimensional elliptic problem with exponentially dominated nonlinearity and a quadratic convection term	19
Muhammad Ahsan Binyamin Improving the computation of invariants of plane curve singularities	51
Jan Chvalina, Šárka Hošková-Mayerová, A. D. Nezhad General actions of hyperstructures and some applications	59
Epure Dănuț-Tiberius, Micu Adrian, Susanu Irina, Micu Angela- Eliza Model for implementing a reengineering solution of the production process	83
Saïd HILMI and Chérif ZITI Possibility of amoebas' aggregation in finite time.....	101
Ahmed A. M. Kamal, Khalid H. Al-Shaalan Commutativity of near-rings with (σ, τ) -derivations	121
Waseem Khalid, Shafiq Ur Rehman Almost Condensed Domains	143
Ravi Srinivasa Rao, K. Siva Prasad Hereditary right Jacobson radicals of type-1(e) and 2(e) for right near-rings	153
Julee Srivastava, Neeta Singh On iterative fixed point convergence in uniformly convex Banach space and Hilbert space	167
Prasit Cholamjiak, Yeol Je Cho, Suthep Suantai Strong convergence theorems for a sequence of nonexpansive mappings with gauge functions	183

Yahya Talebi, Ali Reza Moniri Hamzekolae, Derya Keskin Tütüncü On Rad- D_{12} Modules	201
Marius Tărnăuceanu A characterization of the quaternion group.....	209
Nguyen Tat Thang Generalized Broughton polynomials and characteristic varieties ...	215
Ergül Türkmen Rad- \oplus -supplemented modules	225
Durmuş Albayrak, Sunil Dutt Purohit, Faruk Uçar On q -Analogues of Sumudu Transform	239
Chang-Qun Wu, Yan Hao Strong convergence of a modified Halpern-type iteration for asymptotically quasi- ϕ -nonexpansive mappings.....	261
Yi-Hui Xu, Cai-Mei Yan Some properties of multivalent analytic functions associated with an integral operator	277
C. Gallardo, C. Sanza, A. Ziliani \mathcal{F} -multipliers and the localization of $LM_{n \times m}$ -algebras	285
