

CONTENTS

Alina Alb Lupuş Properties on a subclass of univalent functions defined by using a multiplier transformation and Ruscheweyh derivative	9
Nicoleta Aldea, Gheorghe Munteanu Geometry of product complex cartan manifolds	25
Loriana Andrei On certain differential Sandwich theorems involving a generalized Salagean operator and Ruscheweyh operator	37
Adara M. Blaga, Cristian Ida Generalized almost paracontact structures	53
Murat Caglar The relationships between p-valent functions and univalent functions	65
Aurelian Cernea Some remarks on a fractional integro-differential inclusion with boundary conditions	73
Ion Iulian Florea, Corina Nanau A simulation algorithm for a single server retrial queuing system with batch arrivals	83
Olivia Florea A novel approach of the conformal mappings with applications in biotribology	99
J.M. Kim and Kil H. Kwon Two-channel sampling in wavelet subspaces	115
Rajneesh Kumar Wave propagation in a microstretch thermoelastic diffusion solid .	127
S.R.M. Hassan Mahmoud, Marin Marin, K.S.Al-Basyouni Effect of the initial stress and rotation on free vibrations in transversely isotropic human long dry bone	171

Romulus Militaru	
An adaptive stepsize algorithm for the numerical solving of initial-value problems	185
Claudia Isabela Morariu	
Nonuniform exponential stability for evolution families on the real line	199
Adriana Oprea, Daniel Breaz	
Univalence conditions for a general integral operator	213
Halit Orhan	
$(\alpha, \beta, \lambda, \delta, m, \Omega)_p$ -Neighborhood for some families of analytic and multivalent functions	225
Radu Păltănea, Gabriel Stan	
Transformation of the second order modulus by positive linear operators	237
Adrian Petruşel, D. R. Sahu and Vidya Sagar	
An extragradient iterative scheme for common fixed point problems and variational inequality problems with applications ...	247
Andreea-Elena Tudor, Dorina Răducanu	
On a subclass of analytic functions involving harmonic means	267
Anca Vasilescu	
Upon the Haskell support for the web application development ...	277
Nihat Yağmur	
On neighborhoods of functions associated with conic domains	291
