

CONTENTS

B. Alharbi, A. Alsaedi, R. P. Agarwal and B. Ahmad Existence results for a nonlocal q -integro multipoint boundary value problem involving a fractional q -difference equation with dual hybrid terms	5
Ion Chițescu, Mădălina Giurgescu, Titi Paraschiv Using the Choquet integral for the determination of the anxiety degree	33
Nak Eun Cho, Inhwa Kim and H. M. Srivastava New Criteria for Functions in a Class of Meromorphically Strongly Starlike Functions	57
Disha Garg and Sucheta Dutt Two-dimensional cyclic codes over a finite chain ring	75
T. Glavosits and Zs. Karácsony Functional equations on discrete sets	89
M. J. Nikmehr; R. Nikandish; A. Yassine; K. Hila; S. Hoskova-Mayerova A generalization of n -ary prime subhypermodule	103
Maja Obradović and Marija Milošević A note on almost sure exponential stability of θ -Euler-Maruyama approximation for neutral stochastic differential equations with time-dependent delay when $\theta \in (\frac{1}{2}, 1)$	125
Rongfeng Li, Babatunde Oluwaseun Onasanya, Sherif Olawale Yusuff, and Yuming Feng Some results in the level sets of some bipolar fuzzy relations	149
Josef Šlapal A digital 3D Jordan-Brouwer separation theorem	161
Tulay Yildirim Linear Skew Cyclic Codes over $\mathbb{F}_q\mathbb{S}$	173
