

CONTENTS

B. Alharbi, A. Alsaedi, R. P. Agarwal and B. Ahmad	
Existence results for a nonlocal q -integro multipoint boundary value problem involving a fractional q -difference equation with dual hybrid terms
Ion Chițescu, Mădălina Giurgescu, Titi Paraschiv	
Using the Choquet integral for the determination of the anxiety degree
Nak Eun Cho, Inhwa Kim and H. M. Srivastava	
New Criteria for Functions in a Class of Meromorphically Strongly Star-like Functions
Disha Garg and Sucheta Dutt	
Two-dimensional cyclic codes over a finite chain ring
T. Glavosits and Zs. Karácsony	
Functional equations on discrete sets
M. J. Nikmehr; R. Nikandish; A. Yassine; K. Hila; S. Hoskova-Mayerova	
A generalization of n -ary prime subhypermodule
Maja Obradović and Marija Milošević	
A note on almost sure exponential stability of θ -Euler-Maruyama approximation for neutral stochastic differential equations with time-dependent delay when $\theta \in (\frac{1}{2}, 1)$
Rongfeng Li, Babatunde Oluwaseun Onasanya, Sherif Olawale Yusuff, and Yuming Feng	
Some results in the level sets of some bipolar fuzzy relations
Josef Šlapal	
A digital 3D Jordan-Brouwer separation theorem
Tulay Yildirim	
Linear Skew Cyclic Codes over \mathbb{F}_qS
